Chicago, IL

Portfolio: gjccgj.github.io

EDUCATION

School of the Art Institute of Chicago

BFA -- Fashion and Art & Technology | Expected 2026

Scholars Program

- Fashion Construction I-III; Fashion Design I-III
- Computer Vision; AI + Emerging Technologies
- Creative Coding with JavaScript (in progress)

AWARDS & SCHOLARSHIPS

SAIC Merit Scholarship -- \$72,000 over four years
2023-2027

2025 National Tai Chi Conference Tai Chi Apparel Design
Competition

Best Design Award

- Designed apparel that translated traditional Tai Chi principles and forms into a contemporary visual expression.

SKILLS & LANGUAGES

Creative Technology

TouchDesigner; Arduino; sensor-based interaction; Blender;
real-time AI workflows

Programming

Python (working knowledge); JavaScript

Generative AI & Systems

Stable Diffusion; ComfyUI; ControlNet; IP-Adapter; local LLMs;
Git/GitHub; APIs; MCP; AI agents; multi-agent coordination;
StreamDiffusion (Fall 2026 coursework in progress)

Fashion & Design

Garment construction; patternmaking; textile experimentation;
Adobe Photoshop; Illustrator; Procreate

Languages

Mandarin Chinese (Native)

English (Professional Working Proficiency)

PROFILE

Fashion and Art & Technology BFA student combining apparel design, garment construction, visual storytelling, and creative technology. Currently expanding my practice through computer vision, generative AI, and creative coding, with an interest in visual, interactive, and physical experiences.

EXPERIENCE & PROJECTS

Second Skin Protocol

Bio-responsive Wearable / 2026

- Designed and constructed a wearable second skin using crochet structures, transparent tubing, fluid chambers, and exposed electronics.
- Integrated an Arduino Nano, heartbeat sensor, and water pumps to translate biometric data into changing fluid circulation and physical movement.

Ecological Body

Environmental Data Wearable / 2026

- Developed a fashion-based interactive system that visualizes exchange between the human body and invisible environmental pollutants.
- Used environmental sensors and TouchDesigner to map PM2.5, CO2, and pressure data into real-time changes in color, form, movement, and atmospheric effects.

Curatorial Assistant

Sichuan Fine Arts Institute, China

Supported artist communication, curatorial context, and exhibition layout.
